

Ahmed Hatem Omran

Full Stack Web Developer (MERN Stack)

ahmedhatemomran@gmail.com | +201028844211 | Cairo, Egypt | GitHub | LinkedIn | Portfolio

SUMMARY

Full Stack Developer (MERN) with hands-on experience building responsive web applications using Front end languages, React.js, Node.js, Express.js, and MongoDB. Strong in designing RESTful APIs, managing databases, and writing clean, efficient code. Demonstrated strong Problem solving skills and Organizational skills to deliver user-focused, scalable solutions.

EDUCATION

Information Technology Institute (ITI)

July 2025 – Dec 2025

4-Month Intensive Code Camp – Full Stack Web Development MERN Stack

October 6 University

2016 – 2022

Bachelor of Electrical Power and Machines Engineering

TECHNICAL SKILLS

Programming: JavaScript (ES6+), TypeScript, Python, C++, SQL

Front End: HTML5, CSS3, Bootstrap, Tailwind CSS, Material UI, Angular, Angular js, ReactJs, Next.js, PWA, Front end languages

Back End: Node.js, Express.js, Nest.js, Django, MongoDB, MySQL, SQLite

Tools & Fundamentals: Git, GitHub, Unit Testing, Agile, Web Security, RESTful APIs, OOP, Data Structures

SOFTWARE ENGINEERING PROJECTS

InstaLeh - Social Media Application

Feb 2026 – Mar 2026

Technologies: React 19, Node.js, Tailwind CSS 4, Socket.io, Clerk

- Developed a full-stack social media application, implementing seamless real-time messaging features using Node.js and Socket.io.
- Built a highly responsive and modern user interface leveraging the latest features of React 19 and Tailwind CSS 4.
- Orchestrated secure user authentication and identity management flows utilizing Clerk.

QuickShow - Cinema Reservation Platform

Jan 2026 – Feb 2026

Technologies: React 19, Node.js, Express, MongoDB, Inngest

- Developed a production-ready full-stack booking system deployed on Vercel for serverless scalability.
- Implemented event-driven architecture using Inngest to manage background jobs, including auto-releasing reserved seats upon payment timeouts.
- Integrated Stripe for secure payments and utilized Webhooks to handle real-time transaction verification.
- Orchestrated secure user management via Clerk with an automated synchronization system to MongoDB.

AgriLink Agricultural Platform

Nov 2025 – Dec 2025

Technologies: React, Node.js, MongoDB, Express, Tailwind CSS

- Developed a MERN application facilitating agricultural commerce with interactive geospatial features using React-Leaflet.
- Engineered a secure REST API with Express, implementing JWT auth, Helmet, and rate limiting.
- Orchestrated media management via Cloudinary and handled complex form validation using Formik/Yup.

Easy-to-cook meals

Oct 2025 – Nov 2025

Technologies: Angular, Angular js, TypeScript, HTML, CSS

- Built a dynamic web app using Angular, Angular js and TypeScript to manage recipes, developing reusable components and services.

LANGUAGES

Arabic (Native), English (Professional)
